

8-port terminal box cable

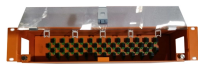

8-port terminal box cable

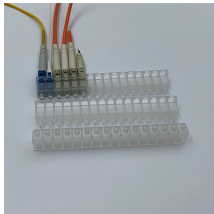

Built for outdoor use, the MST box is ideal not only for FTTH applications but also for FTTA and other harsh environments, ensuring reliable performance and long-term durability.

The box supports up to 8 fiber ports, making it ideal for small to medium-scale distribution points in access networks. It balances capacity with a compact outdoor-friendly design.

This fiber termination box comes with easy-to-open cover & base type to make installation very easy.

The 8 ports terminal box supports a variety of front adapter panel, allowing termination of SC, LC, FC, and ST fiber optic connectors, and accommodates up to 8-core fiber connections.

MST, Fiber Optic Multiport Service Terminal, 8-port, long 2xN port, locatable flat loose tube cable, 800 ft

This distribution box can connect up to 2 optical cables, providing space for distributors and 8 fuses. It is equipped with 8 SC adapters for efficient organization and management.

Suitable for the protective connection of optical cables and wiring pigtails, as well as the use of splitter boxes at fiber optic terminal points in fiber optic access networks.

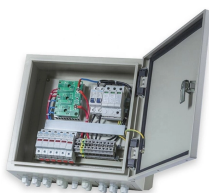

The 8 Port Fiber Access Terminal (FAT) is designed to connect feeder cables to subscriber drop cables for FTTH last-mile fiber connectivity; it can achieve direct or branch and terminal connection in FTTH ...
