

Aisuite3 server failed to run

Overview

If you're using an Nvidia GPU and installed driver version 591.44 yesterday, you've found the cause. How long have you been experiencing this problem?

Are all your drivers (chipset, etc. Was this answer helpful?

Hi I'm Peter an independent advisor, there's quite a few reports. After updating Asus AI Suite (from version 2.10), it is impossible to start it. Nothing happens when I launch AI Suite and I get the following message when the PC starts up: The solutions I've found on the internet are not only dated, they don't work, at least for my version of AI. This is a friendly reminder to change your flair to Support - SOLVED! after your issue has been resolved. However, if it, for whatever reason, malfunctions and throws error messages, you can thoroughly uninstall it with Revo Uninstaller. The only way I know of to make it quit is to reboot. Windows version is 23H2, OS Build 22631.

Aisuite3 server failed to run

Download AI Suite 3 V3.01.10 For Windows 10/11 64-bit. (Worked with Asus X470 ROG STRIX-F motherboard, previous version was 3.00.69) Hi there! This is a friendly reminder to change your flair ...

Run the main Ai suite installer (asussetup) as administrator. Nothing seems to be happening again but just check your task manager for a process called axinst.exe.

Just wanted to share a fix for the "Invalid Argument" error in AI Suite 3 on Windows 11. I updated my BIOS to the latest version and the error is completely gone.
