

Anti-torsion optical cable

Overview

An anti torsion cable is by definition a bond of technical fibers such as Kevlar, ensuring the link between point A and point B with minimum loss of torsion. The anti-rotational device provides a means of stringing fiber optic cable without introducing torsion stress. We do so appreciate your efforts. Contact us if you have any questions. Questions?

Anti-torsion optical cable

The more torsional rigid AT-cable, the quicker and safer the sail will furl. Seldén provide the most rigid cable on the market, three times more rigid than the second best, and it is included in the Seldén GX kit.

The device prevents the cable from twisting as it travels over pulling blocks. Left uncontrolled, the optical cable's delicate glass fibers could be permanently damaged during installation.

For this reason, the art has developed armored optical cables, i.e., steel or aluminum tapes are disposed inside the optical cables to improve the wind and torsion resistance of the...

FIBER OPTIC CABLE HARDWARE OPGW Anti-Rotational Device introducing torsion stress. This unique concept prevents the cable from twisting as it travels over the pulling blocks. Left uncontrolled, ...

To prevent cable twist during installation, the contractor deployed a specialized anti-rotation device. This equipment ensured the OPGW was pulled evenly and smoothly, eliminating rotational stress that ...

The anti-rotational device provides a means of stringing fiber optic cable without introducing torsion stress. This unique concept prevents the cable from twisting as it travels over the pulling blocks.

The Slingco Anti-Rotational Device prevents the cable from twisting ...

The Slingco Anti-Rotational Device prevents the cable from twisting as it travels over pulling blocks. Left uncontrolled, the optical cable's delicate glass fibers could be permanently damaged during installation.

Our main products consist of 0.6-35KV power cables, AAC AAAC ACSR bare conductors, aerial bundled cables, control cables, welding cables, rubber cables, special cables and electrical wires. ...

WHAT IS THE IMPORTANCE OF ANTI-TORSION ROPE OR CABLE ? An anti torsion cable is by definition a bond of technical fibers such as Kevlar, ensuring the link between point A and ...

This anti-torsional device incorporates a 00505-035 series swivel at the lead (pulling line) end, a 00520-035 can-link connector at the tail (OPGW cable) end, and three dangling arms providing the torque ...
