Atlantic cables and their connecting systems are
...

This is a list of terrestrial fibre optic cable projects
in Africa. While submarine communications cables
are used to connect countries and continents to
the Internet, terrestrial fibre optic cables are used
to extend this connectivity to landlocked countries
or to urban centers within a country that has
submarine cable access. In most of the world, a
large number of such cables exist, often
amounting to robust Internet backbones

The lack of such high-speed cables poses a great
problem for most African countries. The
construction of both submarine cables and their
terrestrial extensions is thus considered an
important step to ...
