

Cable tray elbows and cable tray tees

Cable tray elbows and cable tray tees

Cable tray fittings like elbows, bends, tees, crosses, and risers are used to change the direction of cable routing. They allow cables to navigate corners, changes in elevation, or traverse different planes ...

The aluminum I-beam design of ITray is perfect for industrial installations with large diameter cables in long span situations, minimizing total tray width and creating a smooth transition between straight ...

Cable tray elbows, tees, crosses, and reducers are essential fittings used to maintain the proper routing and support of electrical cables within a tray system.

These fittings help in maintaining support of the cable tray system. Shop Graybar's collection of cable tray and fittings to find exactly what works for your job.

TechLine Mfg. manufactures long radius elbow fittings to enhance ease of use for Snap Track cable tray systems. These are available in vertical inside, vertical outside and horizontal configurations.

To facilitate easy installation of cable trays we also manufacture accessories e.g. Vertical bend, horizontal bend, cross and horizontal tee. Our range includes vertical bend, horizontal bend, cross ...

Cable tray fittings are used to change direction, transition, branch, or adapt cable trays within complex wiring routes. They include elbows, tees, reducers, risers, crosses, and drops engineered to maintain ...

Conduit, Raceway & Struts Cable Trays, Fittings & Struts Cable Trays & Accessories Cable Tray Tees

Cut, bend, and connect these wire mesh tray systems to route cable and hose in configurations such as curves, slopes, and tees. They are a lightweight option for organizing bundles of cable and hose ...
