Composite cable trays

Composite cable trays

Corrosion-resistant cable management systems for industrial and utility applications. Composite cable trays provide reliable cable support in corrosive environments where metal trays fail prematurely. Our ...

Learn fiberglass cable tray types and specs. Compare trough, tray, ladder and epoxy composite systems to choose the right cable support for industrial projects.

FRP Cable Trays are non-metallic support systems for routing electrical and data cables in industrial and commercial facilities. Made of fiberglass-reinforced plastic, FRP trays are extremely corrosion ...

Learn how composite cable trays reduce corrosion, improve safety, and lower lifecycle costs in demanding industrial environments.

Built using premium resins and advanced manufacturing techniques, our trays provide secure cable routing, withstand extreme weather, and require minimal maintenance—making them the ideal ...

GRP cable trays for supporting and protecting power and data cables. Lightweight, non-conductive, corrosion resistant and easy to install.

Made from the highest quality pultruded materials, our Fiber Reinforced Polymer (FRP) cable tray is extremely durable and resistant to chemical attack, with a proven record of performance in the most ...

Designed for modern industrial demands, our trays offer exceptional corrosion resistance, high strength-to-weight ratio, and fire-retardant properties—making them ideal for harsh or mission-critical ...

Our GRP cable trays provide outstanding resistance to corrosive environments, extreme temperatures, and heavy loads, ensuring reliable and durable protection for your cables.

FRP cable trays offer corrosion immunity, 50% faster installation, and EMI transparency. We cover specifications, standards compliance, and application guidance for engineers.
