

Costa Rica CIF Price Tunable Optical Module QSFP

Overview

100G QSFP28 CWDM4 is designed to operate over a single-mode fiber system using a 4X25 CWDM channel in 1310 band and links up to 2km. The module converts 4 input channels of 25Gb/s electrical data to 4 CWDM optical signals and multiplexes them into a single channel for 100Gb/s optical. The Cisco 100GBASE Quad Small Form-Factor Pluggable (QSFP) portfolio offers customers a wide variety of high-density and low-power 100 Gigabit Ethernet connectivity options for data center, high-performance computing networks, enterprise core and distribution layers, and service provider. FS 40G QSFP+ optical transceiver module solutions offer a full range of QSFP+ modules from 150m to 80km reach, and used for high-density switching, routing and data center applications. Click to get your 40G QSFP+ transceiver modules from nearby warehouses. While optical transceiver development has gotten simpler over the years, it does involve full engineering development to design, validate, and qualify. The central wavelengths of the 4 CWDM channels are 1271, 1291, 1311, and 1331 nm as members of the CWDM wavelength grid. Join An IT Community Designed to Foster Business Growth.
