

## Does the level 3 distribution box have a portable socket

### Overview

In Australia, New Zealand and many associated South Pacific island nations, the AS/NZS 3123 standard is used. In this series, multiple sizes of three-phase round-pin socket are standardized by current rating and neutral circuit. Each socket within a group accepts plugs in the same group up to its rating, but excludes plugs with a higher current rating, from a different group, or with a neutral pin (if there is not one).

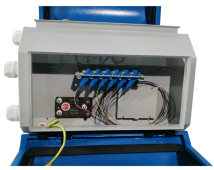

## Does the level 3 distribution box have a portable socket

These boxes, sometimes called spider boxes, let you connect many things to one power source. They help send power to lights, sound systems, food trucks, and radios.

Use it to power lights, effects and audio equipment at live events, convention centers and industrial settings with 20 Amp, 3-phase locking outlet power. The locking outlets help ensure positive ...

The main service panel must have a main disconnect or breaker that can disconnect all power to the building. The disconnect must be located either in the panel or adjacent to the panel.

If raceways enter a switchboard, floor-standing panelboard, or similar enclosure, the raceways (including end fittings) cannot rise more than 3 in. above the bottom of the enclosure [408.5].

Wall mounted thermo-plastic 8 way socket station - IK 08 impact resistance, for use on a 400 volt 3 ph. supply. All control devices are located behind a hinged inspection window,, fitted and wired as follows.

A plug without a neutral pin can be inserted into a socket carrying neutral, but the reverse is not possible as the neutral pin blocks insertion into a socket that does not have a hole for the neutral conductor.
