

## Does the wireless router support 200Mbps fiber optic internet

### Overview

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). What router can handle 200 Mbps?

There are several routers available in the market that can handle 200 Mbps internet speeds. Some popular options include: 1. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity. These newer standards help your connection stay stable even when multiple devices are online. How Do I Know If My Router Is Compatible with Fiber?

If you are wondering can you use any router for internet, the answer is not.
