

# Fireproofing of cable trays in Eastern Europe

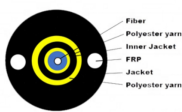

## Overview

Cablofil cable tray is the preferred choice for the cable containment of low and high voltage electric cables where fire resistance is crucial - this includes cable basket tray systems for Prysmian FP (FP400 and FP600) and Draka Firetuf type cables. Our tested solutions for cable fire protection can delay the spread of fire in order to minimise the damage sustained. Meka Pro has tested and continues to test its products and cable management systems' fire resistance with the cables installed and connected according to the temperature curve in the EN 1363-1. HENSOMASTIK® and HENSOTHERM® fire-protection systems for cables and cable penetrations are used as an alternative or addition to cable installation ducts and inhibit or retard the spread of flames and smoke gas release in the event of fire. Cablofil fire resistant and fire proof cable. It should be specified that there are two types of fireproof cables, both very different in their practical application: AS CABLES: They are halogen cables, flame retardant and with low opaque smoke emission. A golden shopping cart icon is shown on all products.

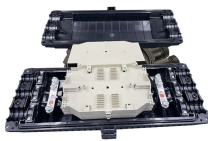

## Fireproofing of cable trays in Eastern Europe

Meka Pro regularly tests the fire resistance of its products to ensure high-quality and safe cable management systems. The products are tested extensively and using several different installation ...

Cable trays and busways at floor level or at slab penetrations shall have a waterstop no less than 50 mm in height. At slab penetrations, provide 20-30 mm of firestopping and install a fire ...

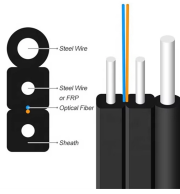

For installations with old cable trays, implemented before present regulations, it is possible to apply the Tecbor® Joint Paste on sections of one meter and at crossing points of different ...

Cable trays and busways at floor level or at slab penetrations shall have a waterstop no less than 50 mm in height. At slab penetrations, provide ...

Fire protection wrap system for effective cable fire protection sheath, which prevents or delays cable combustion along horizontally and vertically laid electrical cables, cable bundles and cable trays.

Fire protection solutions to protect cables, cable trays and cable systems. Discover our tested cable coatings and fire protection bandages!

HENSOMASTIK® and HENSOTHERM® fire protection bandages for cables and cable support systems (cable trays) can inhibit or completely prevent the development of cable fires and the burning of cable ...

“Fyrewrap Cable Insulation®” is a thin and flexible insulation material designed to provide fire protection for cable trays and circuits. Its purpose is to ensure the integrity of electrical circuits when exposed to ...

Our range of trunking and cable tray protection products provide effective fire protection for pipes, cables and trunking within floors, walls and ceilings.

Cablofil Cable Basket - Fire Resistant Cable Tray for FP (Fire Proof) Cables Cablofil cable tray is the preferred choice for the cable containment of low and high voltage electric cables where fire ...

Fields of application pillow for walls and floors. It is designed for use with cables, cable trays and plastic pipes
