

Flame-retardant micro-module data center in the UAE

Flame-retardant micro-module data center in the UAE

We specialize in flame retardant and fire protection solutions that meet regulatory tests for all applications and materials in use today, including wildland fire and electric vehicle (lithium ion/alkali) ...

A practical, standards-based guide to fire detection and suppression in data centers. Covers NFPA 75/2001, TIA-942 and more.

Modular data centers assure scalability for future expansions, embody repeatable designs, and exhibit superior quality via factory control. This simplified assembly enables swift transportation by road, rail, ...

The MDC VAULT Micro is the small data center designed and engineered by Silent-Aire to address the increasing demand for storage and computation of data, closer to where it is being created.

Optimize data centers with performance plastics for aisle containment, airflow management, and equipment protection. Lightweight, impact-resistant, and modular, plastics improve cooling, reduce ...

In this paper, Intel and e& UAE, an Intel® Industry Solution Builders Partner, join to present the strategies and technologies they are using to develop the e& UAE Sustainable Data Center Project ...

Data centre at the Technical University of Darmstadt (Germany) table of the top 500 fastest supercomputers worldwide. Thanks to innovative HVAC equipment it is possible to work ...

In this blog, we'll explore five critical components in data centers that require flame-retardant plastics, and how Calplas® PC/ABS FR108 offers an ideal solution for OEMs and manufacturers.

Plan to Build Your Green Efficient Modular Data Center? Talk to our industry experts to define the solution for you.

In data center environments where cable replacement costs include not only materials but also labor, downtime, and potential service disruptions, the total cost of ownership strongly favors ...
