

Galvanized low-carbon steel wire for optical cables

Galvanized low-carbon steel wire for optical cables

Low carbon galvanized steel wire for optic cable, containing less than 0.25% carbon content, are typically used for applications requiring malleability and ease of welding, such as in the production of ...

With its corrosion-resistant coating, this wire is perfect for outdoor and underground applications. The high tensile strength and flexibility facilitate easy handling and installation, streamlining the cable ...

We have a complete range of galvanized steel wires for your cable applications. If you have an upcoming cable project, request an offer and we will provide you with a tailored offer.

We are proud of our reputation for delivering High Carbon spring steel wire quickly, to specifications, and at competitive prices. Whether you need a prototype or full production run, we can provide you a ...

The galvanized layer is uniform, the adhesion is strong, the corrosion resistance is durable, and the toughness and elasticity are excellent. The tensile strength should be between 900Mpa and ...

As a high-quality steel manufacturer, Wanzhi Steel specializes in producing low carbon iron wires of various diameters from AISI 1006 to 1022, with cold-drawn, annealed, and galvanized options.

Structurally Sound Galvanized Steel Wire from supplier Xiaoguo® offers superior corrosion protection for aerial and buried fiber optic cables. Its proper adhesion and compatibility with other components are ...

Galvanized steel wire is used for strengthening optical cables, and the specifications and technical conditions are customized according to the specific requirements of customers.

Heshan Hang Ke specialises in the manufacture of high and low carbon steel wire products which are used in wide variety of applications across multiple industries.

We are exporter and supplier of good quality Galvanized Steel Wire Strands, known as Core Wires for cables and various industrial uses. Selected materials: Low carbon, medium carbon and high carbon ...
