

High-density modular data centers available for immediate shipment

High-density modular data centers available for immediate shipment

What Is a Prefabricated Modular Data Center? A prefabricated modular data center is a factory-built structure designed to house IT infrastructure in a fast, efficient, and scalable way. Unlike traditional ...

At USA Decom, we specialize in high-quality surplus data center solutions, offering a large inventory of surplus containerized data centers and surplus modular data centers from leading manufacturers ...

Browse Advanced Giga's full lineup of modular data center solutions — from AI-ready compute enclosures to integrated cooling and power systems. Built to deploy fast.

Our experts will design a pre-engineered data center tailored to your capacity, cooling, and scalability needs — delivered with clear specs, timelines, and costs.

Modular data centers are built in controlled factory conditions, fully tested before shipment, and deploy in months, not years. You get predictable performance, step-by-step scalability, and on-premise control ...

Turnkey modular data center solutions for AI, HPC, and edge deployments. Vendor-neutral design, factory-built modules, and full lifecycle delivery across North America.

Built off-site and deployed in weeks, these shipping-container-style pods support high-density AI workloads, edge computing and sovereign infrastructure closer to where data is created.

CenCore's modular data centers deliver secure, high-performance computing with rapid deployment, TEMPEST compliance, & modular expansion rapidly.

Schneider Electric Prefabricated Modular Pod Data Center is engineered for speed, scalability, and flexibility. It supports up to 40+ high-density racks per pod with hybrid liquid-air cooling.

Modular data centers assure scalability for future expansions, embody repeatable designs, and exhibit superior quality via factory control. This simplified assembly enables swift transportation by road, rail, ...
