

How to disconnect and connect fiber optic cable to a router

Overview

Connecting a fiber optic cable to a router might seem daunting at first, but with the right tools and a bit of patience, it's a straightforward process. Here's a step-by-step guide to help you through it. Understand the Basics Before diving in. In this guide, we'll walk you through how to connect a fiber optic cable to a router safely and efficiently. The fiber line terminates at the Optical Network Terminal (ONT), which is typically supplied and installed by the internet service provider. Make sure the connection is tight to avoid connection problems. Turn on the router: Once the fiber optic cable is connected to the router, turn the device. When you connect the fiber optic cable correctly, you keep your fiber internet, ONT (optical network terminal), and router running at peak speed. You don't want to dig around mid-job for something small but essential.

How to disconnect and connect fiber optic cable to a router
