

How to find the location of the distribution box

Overview

Look for the distribution box near the septic tank, at the edge of the drain field, or along the outlet pipe from the tank. Check for access lids or covers in the ground, usually small, square or round, and buried 6 inches to 2 feet deep. Always use caution and look for. A distribution box, also known as a distribution board, electrical panel, or breaker box, is an enclosure that houses electrical components responsible for distributing electricity throughout a building. It receives power from the main electrical supply and divides it into separate circuits, each. Step 1: Check the Septic Tank Start by locating the septic tank. It's typically buried underground and marked by a concrete or plastic lid. The panel houses circuit breakers that control individual circuits to protect wiring, appliances, and your household in case of electrical. Electrical panel boxes, aka breaker boxes, can be on a wall in an out-of-the-way area of your home.
