

How to replace the fiber optic cable in your home with a router

Overview

In this article we'll break down how fiber internet is installed - from the network fiber drop outside your house to the in-home setup with your router and gateway - and what you should expect at each stage. To connect your fiber optic cable to a router, ensure you have the following: Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. This means you don't need a specialized modem-router device, but your router must support high-speed Ethernet input. Here's a step-by-step guide to help you through it. Understand the Basics Before diving in, familiarize yourself with the components involved:.
