

How to use fiber optic cable brackets

Overview

Learn how to splice fiber optic cable using fusion splicing with this complete step-by-step guide. Includes tools, best practices, loss standards (ITU-T G. 652), cost analysis, and FAQs for network engineers and installers. You are watching the video tutorial of options for deployment of fiber optic cable, by universal pole bracket or fiber optic cable traverse. What is a Universal Pole Bracket?

The UPB is a lightweight yet high-strength bracket designed to securely mount fiber optic cables, including ADSS (All-Dielectric). Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. During installation, all curvatures should be smooth. Turn-backs and all sharp changes of direction. Fiber optic cables can be easily damaged if they are improperly handled or installed.

How to use fiber optic cable brackets

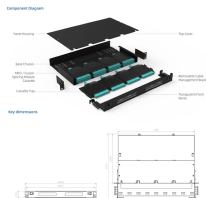

The following applies to all fiber count gel-free and gel-filled armor ribbon cables installed in aerial plant, including down pole pedestal turn-ups: When jacket opening is made for a splice closure, pedestal, ...
