

Intelligent Fiber Optic Cable Laying Frame in Chile

Overview

The project will provide direct connectivity between South America and the Asia-Pacific region, reducing latency (accelerating data transmission) and granting greater autonomy and resilience to Latin American telecommunications, solidifying Chile's position as a digital hub and. The project will provide direct connectivity between South America and the Asia-Pacific region, reducing latency (accelerating data transmission) and granting greater autonomy and resilience to Latin American telecommunications, solidifying Chile's position as a digital hub and. The Humboldt Cable is the first submarine fiber-optic route that will connect Chile with Australia, enabling faster, more stable, and cost-effective connectivity between South America, Oceania, and the Asia-Pacific region. This joint initiative between Google and the Chilean government aims to. Today, we're joining Desarrollo País of Chile and Office of Posts and Telecommunications of French Polynesia (OPT) to announce Humboldt, a subsea cable route linking Chile, French Polynesia, and Australia — the first ever to directly connect South America and Asia-Pacific.

Intelligent Fiber Optic Cable Laying Frame in Chile

Chile has signed an agreement with Google to lay a submarine cable connecting Chile to Oceania. Dessarollo Pais, a state-owned infrastructure developer, and the Office of Posts and ...

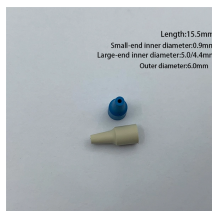

Humboldt Cable is a planned fiber optic submarine communications cable that will connect Chile with Australia, becoming the first-ever link between South America and the Asia-Pacific region. As of 2025, the plan is to build a 14,800-kilometre (9,200 mi) cable from Valparaíso, Chile, to Sydney, Australia, via French Polynesia.

Se trata de una fibra óptica submarina que conectará Chile y Australia, siendo el primer cable en unir directamente Oceanía, Asia y América del Sur. La iniciativa es impulsada por el ...

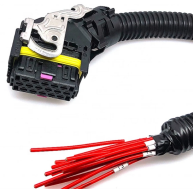

The Humboldt cable system forms a transpacific subsea cable route connecting Australia, the French Polynesia and Chile over two fiber pairs, with a total system capacity of approximately ...

Google has signed an agreement with Chile to build an undersea fiber optic cable connecting South America with Asia and Oceania.

Tech giants Google plan to link Chile with Australia and French Polynesia through the Humboldt cable, which would become first direct submarine link between South America and ...

Humboldt Cable is a planned fiber optic submarine communications cable that will connect Chile with Australia, becoming the first-ever link between South America and the Asia-Pacific region.

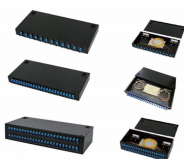

When operational, Humboldt will strengthen the reliability and ...

Google has forged a groundbreaking agreement with the Chilean government to lay a 14,800-kilometer submarine data cable across the Pacific Ocean, enhancing digital connectivity ...

Increase capacity and improve communication latency in Chile and South America in a scenario of explosive traffic increase with new technologies such as 5G or internet of things. A special purpose ...

The Humboldt Cable is the first submarine fiber-optic route that will connect Chile with Australia, enabling faster, more stable, and cost-effective connectivity between South America, Oceania, and ...

When operational, Humboldt will strengthen the reliability and resilience of digital connectivity across the Pacific by interconnecting the cables that comprise the South Pacific Connect...
