

Jordan Stockpiled Fiber Optic Hybrid Cable ADSS

Overview

All-Dielectric Self-Supporting (ADSS) cable is designed for outside plant aerial and duct applications in local and campus network loop architectures. A separate messenger support wire hanging system is not required, reducing installation time and improving upfront and maintenance. AFL-ADSS® (All-Dielectric Self-Supporting) fiber optic cable is a non-metallic cable which supports its own weight without the use of lashing wires or messenger cables. The economical single-jacket design can span distances of 800 ft in NESC light conditions, 650 ft in NESC medium con cent and craft-friendly cable preparation.

Jordan Stockpiled Fiber Optic Hybrid Cable ADSS

The ADSS cable shall be attached to the pulling rope using a double swivel eye and woven wire grip. The double swivel eye insures the ADSS cable will not see an induced torque as the pulling line ...

RFS Technologies designs and manufactures premium-quality cable and antenna solutions for wireless, public safety, distributed antenna system (DAS) and other telecom markets in North America.

As its name indicates, there is no support or messenger wire required, so installation is achieved in a single pass, making ADSS an economical and simple means of building a fiber optic network.

ADSS fiber optic cable is a full-media self-contained fiber optic cable, all cable no metal, and can be connected to the transmission pole tower through pre-stranded gold, self-supporting overhead.

This type of cable does not need a messenger to support it, so it can be installed in a single pass. This cable construction does not contain any metallic elements so it is also non-conductive.

ADSS fiber optic cables are designed for aerial deployment, offering a cost-effective and efficient solution for various applications. They are characterized by their lightweight, high tensile ...

We maintain stock of all common fiber counts of ADSS Cable, ready to manufacture and serve as your one-stop solution for ADSS Fiber Optic Cable, FTTH (Fiber to the Home), OSP (Outside Plant), ...

ADSS Cables are designed with high strength aramid yarns that are distributed evenly over the core and provide high tensile strength in self-supporting applications. The cables are light in weight and used ...

Overview
