

Many fiber optic cables are now

Overview

As the industry looks ahead, six major trends are shaping the future of fiber deployment—from smarter buildouts and next-gen cables to workforce training and quantum-driven innovation. Federal funding to bring broadband to unserved areas is also expected to drive expansion. This visualization shows the growth of the undersea cable network, global internet peering capacity, and the distribution of IP addresses via BGP announcements over time. Use the controls at the top to play the animation or step through year by year.] and RVA Market Research and Consulting. 5%) are now serviceable by fiber—an increase of 13% in 2024. Without them, seamless international. Meta will pay Corning up to \$6 billion through 2030 for fiber-optic cable in its AI data centers. In an exclusive interview from a Corning factory in Hickory, North Carolina, CEO Wendell Weeks told CNBC that he thinks "next year the hyperscalers will be our biggest customers. " Corning's stock is up.

Many fiber optic cables are now

As of 2000, more than 80% of the world's long-distance communication cables are fiber-optic cables. The statistics below demonstrate the immense scale of the fiber optics industry's...

Corning, a 175-year-old glassmaker known for supplying iPhone glass, is now at the center of the AI infrastructure boom with a new type of fiber-optic cable

Explore the physical backbone of the internet with our interactive map of undersea fiber optic cables, peering exchange points, and more. Visualize the growth of global connectivity.

Now, scientists warn, the cables themselves could listen in. A fiber optic technique used to detect earthquakes can also pick up the faint vibrations of nearby speech, researchers reported this ...

Submarine and terrestrial fiber optic cables form the backbone of modern global communication, carrying data across continents at incredible speeds. These networks enable internet access, ...

As the industry looks ahead, six major trends are shaping the future of fiber deployment—from smarter buildouts and next-gen cables to workforce training and quantum-driven ...

Fiber optic network deployments have reached a milestone as they now pass more than 50% of U.S. households, according to recent report from the Fiber Broadband Association (FBA) [1.] ...

And now we know why. Photographs snapped by Hawaiian Telcom workers show multiple fiber optic cables cut in two.

Fiber optic network deployments have reached a milestone as they now pass more than 50% of U.S. households, according to recent report from the ...

Explore the 2026 data showing why fiber internet is overtaking cable. Learn how speed, reliability, and new infrastructure are driving the next big shift in U.S. connectivity.

Corning and Nvidia just announced a multiyear deal to expand U.S. manufacturing of the optical connectivity solutions essential to powering Nvidia's next-generation AI infrastructure. Corning is ...

Explore the 2026 data showing why fiber internet is overtaking cable. Learn how speed, reliability, and new infrastructure are driving the next big shift in U.S. ...
