

Monaco connects fiber optic cables

Overview

Monaco is now 100% covered by the fiber optic network, four years after the rollout of the high-speed internet service began. As the name suggests, Dedicated Fiber is designed exclusively for businesses. Internet access is directly connected to the optical connection point. This exclusive connection allows for high-speed. The Principality has made its next step into the digital transition as the technical installations for super high-speed fibre connectivity has been completed after three years of work. Installing fibre optics for a faster internet connection is one of the key aims of Monaco's digital transition, but. From August 1, telephone calls and access to the internet will have to rely on new technologies or risk no longer working.
