

# Namibian Temperature-Controlled Server Rack with Low Noise

### Overview

Designed to provide scalable solutions for data storage and management. Our cold aisle containment focuses on directing cool air to the front of server cabinets. Servers running 24/7 in residential spaces must not create discomfort for household members or neighbors. Rated IP55, they. If you're installing networking or IT gear outdoors—like cellular backhaul, public Wi-Fi hubs, traffic control systems, or remote surveillance servers—you need a rack that survives rain, dust, UV exposure, and temperature swings. Over the past year, demand for IP55-IP66-rated outdoor server racks. When you need efficient cooling for your server setup, the Tupavco Rack Mount Fan (TP1701) stands out as an ideal choice. This compact fan, only 1U in height, fits perfectly in any 19-inch rack. With four fans, it delivers an impressive airflow of 300 cubic feet per minute while operating quietly. A quiet server for home lab use isn't just a nice-to-have — it's often essential if your setup runs in a home office, bedroom, or shared space.
