

Original and genuine anti-tracking transimpedance amplifier

Original and genuine anti-tracking transimpedance amplifier

To minimize these effects, transimpedance amplifiers are usually designed with field-effect transistor (FET) input opamps that have very low input offset voltages.

Transimpedance amplifiers are available at Mouser Electronics from industry leading manufacturers. Mouser is an authorized distributor for transimpedance amplifier manufacturers including Analog ...

Analog Modules, Inc. (AMI) designs and manufactures a range of transimpedance amplifiers for OEM, medical and research applications. AMI's amplifiers combine low noise, high gain, large dynamic ...

Semtech offers a broad portfolio of fully integrated BiCMOS and pure CMOS transimpedance amplifiers (TIAs) providing wideband, low noise pre-amplification of a current signal from a PIN or APD ...

High-performance TIAs for next-generation optical receivers. Coherent's portfolio of high-speed transimpedance amplifiers (TIAs) delivers best-in-class signal integrity, high programmable gain, and ...

An instrumentation amplifier is a precision differential amplifier, typically built from three op amps, designed for accurate measurement of very small voltage differences in noisy environments.

An Extensive Library of Self-Developed Products

Fortunately, adding an ideal op-amp allows us to control both the input impedance and output impedance and make a much improved current-to-voltage converter. This overall circuit is called a ...

Marvell's transimpedance amplifier (TIA) portfolio powers PAM4 and Coherent-based pluggable optical modules for high-speed cloud AI connectivity and long-haul optical links from 100G to 1.6T, and beyond.

Our high-bandwidth transimpedance amplifier (TIA) portfolio includes devices with variable gain settings, fast recovery time, internal input protection and fully differential outputs that are optimized for a wide ...

Analog Devices' optical and logarithmic transimpedance amplifiers (TIAs) offer high performance, single-chip solutions for precise photodiode current-to-voltage conversion.
