

Overseas Warehouse Access Switch SFP

Overseas Warehouse Access Switch SFP

Whether you are a growing enterprise, data center, or a high-tech lab, our 8-port 10G SFP+ managed switch ensures your network operates at peak performance. With a switching capacity of 160Gbps, it ...

NETGEAR IGMP Plus™ provides multicast functionality right out of the box for most AV over IP applications. Less fan noise, and mounting ears included for rack mounting. Auto-trunk and auto ...

It offers high performance and reliability for high bandwidth aggregation and access network applications. The 10G and 25G SFP links provide the necessary backbone capacity to meet the high ...

Ideal for Audio over IP deployments as a core connecting to 1G M4250 switches (SFP ports). Multi-color LED on each physical port reflecting the profile color in the NETGEAR AV OS™ and Engage ...

Unmanaged 5-port Gigabit Ethernet PoE switch with SFP slots expands connectivity in harsh environments, including factories, warehouses and construction sites.

Discover multi-gigabit Ethernet switches with 2.5G and 10G ports for blazing-fast network speeds. Explore managed features, PoE support, and compact designs.

Discover multi-gigabit Ethernet switches with 2.5G and 10G ports for blazing-fast network speeds. Explore managed features, PoE support, and compact designs.

This switch features two 1Gb SFP fiber ports and eight PoE+ ports, allowing for flexible connectivity options. With the capability to support two Hi-PoE ports, it ensures efficient power delivery to your ...

The switch is compact and fanless, resulting in a silent operation suitable for deployments in workgroup areas, and also reduces power consumption and improves mean time between failures (MTBF) by ...

10 Gigabit SFP switches proudly manufactured in the USA by Versitron are available in 28, 36, and 52 port sizes with managed configuration capability. Each 10 gig SFP switch has 4x1G/10G SFP/SFP+ ...

Multiple physical switches can be virtualized into one logical unit to simplify network configuration and architecture, eliminating loops, and improving reliability.
