

PoE Switch Power Saving Functions

Overview

There are different types of PoE switches, including PoE (IEEE 802.3bt), capable of delivering up to 60W or 100W per port. A PoE (Power over Ethernet) switch is a network switch that delivers both power and data through a single Ethernet cable to connected devices such as IP cameras, VoIP phones, wireless access points, and IoT devices. This eliminates the need for separate power adapters, reducing cable clutter and.
