

Precision Display Cabinet Energy Efficiency Certification

Overview

This Standard provides definitions, classifications, and a method for determining calculated daily energy consumption (CDEC) values and specifies minimum energy efficiency requirements for refrigerated display cabinets. Find everything you need to start shopping for ENERGY STAR certified products for your home or business, including product details and rebates. ENERGY STAR is a program run by the U. Environmental Protection Agency (EPA) that provides tighter regulation of energy and. The CalNEXT program is designed and implemented by Cohen Ventures, Inc., DBA Energy Solutions ("Energy Solutions"). Southern California Edison Company, on behalf of itself, Pacific Gas and Electric Company, and San Diego Gas & Electric® Company (collectively, the "CA Electric IOUs"), has contracted. Refrigerated Display Cabinets (RDCs) are essential for modern food retail, combining refrigeration performance with visibility and accessibility. Critical to ensuring the safety of refrigerated and frozen products, RDCs can be found anywhere where food and drink is served or sold, from supermarkets. Home / Testing and Certification / Testing Services / Energy Efficiency Verification Evaluate and address energy consumption and energy issues with our EEV services.

Buildings whose permit applications are applied for on or after January 1, 2026, must comply with the 2025 Energy Code.
