

Red light pen for multimode fiber optic cable

Red light pen for multimode fiber optic cable

Easy to Check Fiber Faults: This Visual Fault Locator will emit a 650nm bright red light which has strong Penetrating power, can accurately detect and locate fiber breaks, poor connections, bending, or ...

The Visual Fault Locator (VFL) Pen has a visible red light source centered on 650nm. Tool sends visible light over a fiber strand with a 10mW power, good enough to reach distances of up to 10Km.

For single mode, multimode and plastic fibers, this is a low price fiber laser light tester that complies with the latest visible eye safety standards for fiber laser testers.

Easy to Check Fiber Faults: This Visual Fault Locator will emit a 650nm bright red ...

The Optical Fiber Visual Fault Locator (Red Light Pen) utilizes a 650nm semiconductor laser, offering a reliable and stable red light output for fiber fault detection in both single-mode and ...

The 2.5mm universal connector of the detector is compatibly designed for ST, SC, FC interfaces both in circle and square shape of different fiber optic cables. Test for both single-mode and multi-mode cables.

WIDELY USED ON FC, SC, ST GENERAL FIBER INTERFACE - This Visual Fault Locator Built With 2.5mm Universal Connector for Testing Different ST, SC, FC Interferes Fiber Optic Cables;

By transmitting a bright beam of red light into a fiber, breaks or improper terminations can be seen as a glowing red light. This device is especially applicable for field installation of UniCam MT-RJ.

Visual Fault Locator designed for quick and efficient maintenance of fibre optic networks. Can be used for tracing and continuity checks allowing rapid identification of specific fibres.

Universal Compatibility: The locator's 2.5mm universal connector works seamlessly with ST, SC, and FC interfaces, making it ideal for both single-mode and multi-mode cable testing. (For LC cables, simply ...
