

Shanggao Fire Cable Tray

Shanggao Fire Cable Tray

The surface of the fireproof channel cable tray has a frosted feeling. It is generally used in the distribution line of fire fighting equipment, such as fire control rooms, fire pumps, fire elevators, ...

They are made of a steel frame coated with fire-resistant paint or composite fire-resistant panels. Under high temperatures, they form a heat-insulating char layer that prevents the spread of fire.

Shop high-quality fire resistance cable trays for reliable networking. Customize your solution with durable, efficient, and cost-effective options. Buy now!

Explore the importance of fire-resistant cable trays in high-risk environments. Learn about the best materials and practices to ensure maximum safety and performance in fire-sensitive areas.

Good fireproof performance: fireproof cable tray is made of fireproof material, which can maintain stability in high temperature environment for a long time and can pass strict fire test to ensure its fire ...

Good fireproof performance: fireproof cable tray is made of fireproof material, which can maintain stability in high temperature environment for a long time and can ...

Shangang Heavy Industry Machinery Co., Ltd
Mainly produces power cables, high-voltage cables, overhead cables, control cables, flame-retardant and fire-resistant cables and other products.

The open design facilitates cable ventilation and cooling, and is suitable for places with high-power equipment and dense cable wiring. It allows cables to be arranged across different ladder sections, ...

Product Description: The cable tray is crafted from high-strength solid materials, featuring a sturdy structure and robust load-bearing capacity. It is characterized by outstanding corrosion resistance ...

Lightweight yet highly durable, it offers reliable safety and easy installation. Widely applicable in chemical, petroleum, metallurgy, and other environments with fire protection requirements, it ...

The perforated Cable Trays adopts the bottom plate/side plate punching structure (round hole/long hole), and the air circulation efficiency is improved by more than 50% compared with the fully ...
