

Southeast Asia New Energy Smart Internet

Overview

Power networks in Southeast Asia must be modernized and more flexible to meet rapidly growing energy demand. ADB's \$70 billion plan includes a pan-Asia power grid initiative and an Asia-Pacific digital highway for better connectivity in the region. A solar power plant in Vietnam's Tay Ninh Province. Strategic investments and collaborative efforts can help. Through a lens of innovation, inclusion, interoperability and sustainability, the SIIA conducted closed-door roundtables and interviews to garner insights from policymakers and the private sector between September 2022 to April 2023, which feeds into this report. With the lifting of travel. Together with our partners and customers, we are creating smart mobility, clean energy, intelligent automation and digital solutions that bring people closer and build brighter communities. Through these stories and conversations, discover how our Social Innovation Business is making a difference. The Southeast Asia-Japan 2 (SJC2) cable stands as a significant testament to this commitment.
