

# Standard configuration of portable power distribution box

## Overview

Portable distribution boxes are mainly composed of core components such as shells, circuit breakers, sockets, terminals, leakage protectors, fuses, etc. As a protective "armor", the shell is mostly made of high-strength engineering plastics or aluminum alloys. Generator Tap Box and Boxes, Generator Connection Boxes and Generator Connection Panels are intended for use as a temporary service connection point between portable power units and the facility service entrance. When normal utility power is interrupted for long periods of time (natural disaster, temporary power, Engineered utilizing the latest in GFCI technology, Southwire's iconic yellow temporary power boxes have been providing contractors, electricians, and engineers with the highest level of electrical safety for over 35 years. Our application engineers are ready & willing to provide assistance and support during the technical specification & design process. The Walther combination outlet system. The Larson Electronics Power Distribution series consists of portable power distribution products for industrial locations, combustible work sites and temporary projects with limited electrical infrastructure. This device safely takes power from a single source, such as a generator or temporary utility service, and

divides it into.

## Standard configuration of portable power distribution box

STANDARD FEATURES NEMA 3R all aluminum construction, Heavy-duty stackable legs w/ built-in handles or heavy-duty stackable cage Custom powder coat Custom UV-printed graphics
