

Swiss 6-core smart building optical cable application

Swiss 6-core smart building optical cable application

Applications in Smart Buildings Fiber optic cables are crucial in enabling the infrastructure of smart buildings. They support a wide range of Internet of Things (IoT) devices, from smart HVAC ...

Very easy to install, the string is ideal for real time continuous and unattended monitoring of lateral displacement of soil, rock and structures.

This article presents a comprehensive guide to designing a future-proof fiber cable backbone for multi-tenant buildings, with a focus on standards compliance, scalability, bandwidth ...

A guide to determining the suitability of UL Certified, Listed, Classified and Verified wire and cable for use in a specific installation.

From cable for PoE (power over Ethernet) to fiber optic systems, the right cabling ensures that smart buildings not only meet current demands but are also prepared for future innovations.

Specifications are correct at time of printing and subject to change or alteration without notice.

Planning, constructing, operating, and maintaining cable systems for high- and ultra-high-voltage power transmission is a complex and demanding job. You can rely on us to take care of all these tasks in ...

Let's learn more about the role of optical fiber cables in building a robust in-building digital infrastructure. A robust in-building digital infrastructure improves tenant experience, enables smart ...

With the optical fibre expansion, your Internet connection will be switched from copper to optical fibre. Find out here how the switch will be carried out.

Building Management System (BMS) Cabling Guide for Smart Buildings (2026) A procurement-friendly, engineer-approved blueprint to select RS-485, KNX/EIB, control, Ethernet, coax, and fiber cabling for ...
