TP-Link can be used as a core switch

TP-LINK Deco X20 - 2 Gig Ports - can be used as switch? Hi, considering purchasing two pcs of this mesh router. Each has two gigabit lan ports at the back. I will use one of the ports on each device to ...

Redundancy and High Availability: Deploy redundant core switches, use dynamic routing protocols (such as OSPF, BGP) and link aggregation (LACP) to enhance network reliability.

Each switch may have limitations on it's LAGG configuration and is documented in the user manual for each individual switch. I'm hessitant to add a bunch of vlan's because as is, it works ...

In this video, I am showing how to use Omada Switch to do Layer 3 switching for InterVLAN and Internet Traffic. #arciesabode #omada #tplink...more

Correct, there may not be a similar product to what you are looking for. Best Regards!

The TL-SG3452XP is the high-density PoE+ switch in TP-Link's JetStream enterprise range — 48 ports in a single 1U rackmount chassis. A typical enterprise deployment connects IP cameras, ceiling ...

They can route packets more efficiently than a conventional router, but lack certain routing features, such as VPN support. These are ideal for the core layer of a medium sized business ...

Omada controller based networks do not allow the removal of the default vlan from any gateway ports, making using multiple uplinks from the core switch extremely difficult, especially so as ...

Yes, you can connect a TP-Link switch to a UniFi Dream Machine UDM or UDM Pro. The switch will function, but it won't be visible or manageable within the UniFi controller interface.

Enterprise-grade hardware and advanced software features make Omada switches ideal for small and medium-sized businesses, from core to edge. Comprehensive product options meet diverse needs.
