

The distribution box should be inspected regularly for safety

Overview

Regularly inspect Low Voltage Distribution Boxes every three months to catch problems early and avoid costly repairs. Always clean the boxes using safe methods. LV intrusive switchboards accept power from the utility & generator & distribute it to building circuits. Multiple circuit breakers or fuses safeguard. By inspecting and patrolling our distribution lines and facilities, we stand a greater chance of maintaining the system to be able to deliver safe and reliable service to our customers. Examine for any signs of overheating or arcing. Internal Inspection Open.

The distribution box should be inspected regularly for safety

By inspecting and patrolling our distribution lines and facilities, we stand a greater chance of maintaining the system to be able to deliver safe and reliable service to our customers.
