

Upgraded version of Belgian dense wavelength division multiplexer directly supplied by the manufacturer

Overview

The MPS-2900 Singlemode Dense Wavelength Division Multiplexer (DWDM) provides a cost-effective solution for increasing fiber optic network signal capacity by enabling the simultaneous transmission of eight wavelengths over the same common fiber. This technique enables bidirectional communications over a. For purchasing, use the RP Photonics Buyer's Guide for wavelength division multiplexing. It provides an expert-curated supplier directory, buyer-focused technical background information, and structured selection criteria to support professional procurement decisions. As 5G, cloud, and AI workloads soar, DWDM is no longer a telecom-only domain—it's a digital economy enabler. In 2025, this market. As specialists in WDM multiplexing, Pro Optix offer four different series of WDM multiplexers to our customers, depending on performance and density requirements, so please liaise with the Pro Optix team to qualify what meets your needs most effectively.
