

# What are the requirements for secondary power distribution boxes on construction sites

## Overview

If you're using weatherproof panels or distribution boxes, make sure they are NEMA-rated and appropriate for the worksite. 408 contain installation safety requirements for electrical equipment and installations used to provide electric power and light at the jobsite. These sections apply to installations, both temporary and permanent, used on the jobsite; but these sections do not apply. Whether you need an industrial portable power station, a complete jobsite power station, or help managing temporary wiring and distribution, this will help you stay compliant with all the necessary requirements. Temporary power systems tend to be exposed to harsh environments and frequent use. It requires careful planning and adherence to strict standards to avoid common hazards associated with electrical setups. Here, we outline several best.
