

Where is the router s fiber optic line located

Overview

Before connecting the cable, locate the fiber optic port on your router. It's typically labeled as "Fiber," "ONT," or "WAN" (Wide Area Network). The fiber optic cable does not plug directly into a standard home router because the signal type must be translated. The fiber line terminates at the Optical Network Terminal (ONT), which is typically supplied and installed by the internet service provider. The front panel's unified button allows quick access to the Wi-Fi Protected Setup (WPS) feature and pairing mode. I want to move it to a central location, i. e, the laundry room, where there are wall boxes that distribute ethernet and coax cables throughout the house.

Where is the router s fiber optic line located

The rear panel of your router has a label that contains important information about your device, including the default settings for the Fios Router's Wi-Fi name (SSID), Wi-Fi password (WPA2 key), local URL ...
