

Yemen fiber optic cable

Overview

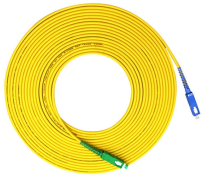

Multiple reports say several subsea fiber-optic cables in the Red Sea and southern Red Sea near Yemen were severed or damaged, disrupting internet traffic across parts of the Middle East, South Asia and East Africa, and fueling finger-pointing at Yemen's Iran-aligned Houthi rebels. Multiple reports say several subsea fiber-optic cables in the Red Sea and southern Red Sea near Yemen were severed or damaged, disrupting internet traffic across parts of the Middle East, South Asia and East Africa, and fueling finger-pointing at Yemen's Iran-aligned Houthi rebels. Multiple reports say several subsea fiber-optic cables in the Red Sea and southern Red Sea near Yemen were severed or damaged, disrupting internet traffic across parts of the Middle East, South Asia and East Africa, and fueling finger-pointing at Yemen's Iran-aligned Houthi rebels even as. Only a few weeks following an alert regarding the potential threat from Houthi rebels to underwater cables in the Red Sea, it has been reported that a fiber-optic cable off Yemen's coast has been cut, with possible damage to three additional lines. Previously, the Red Sea facilitated roughly an. Just weeks after a warning about potential Houthi threats to subsea cables in the Red Sea, at least one fiber-optic line has been severed at

a position off the coast of Yemen, and damage has been reported (but not confirmed) on three more. Such a threat not only poses a threat to geopolitical stability but could also have a serious impact on global financial markets. For long-distance and high-performance data networking, fibre optics are utilised. The Iran-backed Houthis had already threatened to target the fiber optic cables, which carry an estimated 17% of the world's internet traffic, and it now appears that the group has.
